JOURNAL INDEX

ABSTRACTS 171,533 TO 185,339

The Journal Index indicates the abstract numbers for each journal issue covered. To locate the abstracts for the January 1971 issue of ZH. OBSHCH. KHIM., check the Journal Index under the title and issue number. The pertinent abstract numbers will then be found under 174,666-4,703.

NNC in place of an abstract number indicates that this particular issue of the journal does not contain articles reporting new compounds, new reactions or new syntheses.

ROTAFORM INDEX®

ABSTRACTS 171,533 TO 185,339

The *Rotaform Index* contains all molecular formulas included in the 1971 Annual Cumulative Molecular Formula Index. However, those compounds containing *only* carbon, hydrogen, nitrogen and oxygen have been omitted.

In the *Rotaform Index,* the order of elements in the molecular formula is "rotated" so that each element appears as a heading in the index. Anyone interested, for example, in compounds containing *Iridium* can locate them easily in the *Rotaform Index* under the heading *IR* appearing on page 343 column 300. For each different molecular formula indexed there is a separate entry. To find the associated abstract and compound number for each entry, turn to the Molecular Formula Index. For example, to find IR B F4 C12 H18 N2 look in the Molecular Formula Index under C12 H18 B F4 IR N2 . . . 172654-4.

This same molecular formula will also be found in the *Rotaform Index* under the headings B and F.

Users of the *Rotaform Index* will undoubtedly be interested in the additional substructure search capabilities of ISI's new *Chemical Substructure Index*™ in which, through the use of Wiswesser Line Notations, it is possible to do much more complex or specific types of substructure searches.

*Perquisitor—a diligent searcher

When you have a literature search to do and time is running out, use *ISI Search Service.* With *Search Service,* you can get the information you need to document and perform your research project quickly, efficiently, and most economically. What's more, when ISI does your searching, you take advantage of one of the world's largest scientific data bases. The same one that's used to prepare the *Science Citation Index*® and *ASCA*®. Our information-savvy perquisitors are eager to help with your searching. Call today or write Dept. CAC-296c for details on *ISI Search Service.*

Instructions for Binding CURRENT ABSTRACTS OF CHEMISTRY AND INDEX CHEMICUS™

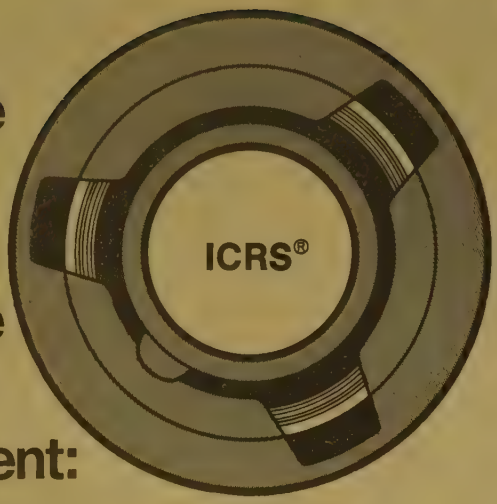
We urge all subscribers to bind issues 371 through 422 at this time. It will probably be most convenient to have each volume of your *CURRENT ABSTRACTS OF CHEMISTRY AND INDEX CHEMICUS* bound separately, and to imprint on the outside, identifying abstract numbers as follows: Vol. 40, 171,533-174,823; Vol. 41, 174,824-177,841; Vol. 42, 177,842-181,458; Vol. 43, 181,459-185,339. This Annual Cumulative Index replaces both the monthly and semiannual interim indexes that have appeared previously.

Your comments are always welcome.

Want tear sheets of any article listed in any of ISI's Services?

Use our Original Article Tear Sheet Service.

The cost of OATS is $2.00 for articles up to 10 pages, plus $2.00 for each additional 10 pages or fraction. There is a 50c service charge for each article. Air mail or special delivery costs an additional 50c per article. You can pay for OATS service by check or with ISI stamps in units of $10.00. We will bill you.



OATS® Hot-Line

Now . . . you can request OATS service around the clock, using our new OATS HOT LINE. Dial direct anytime, day or night. Monday through Saturday, from 8:30 A.M. to 10 P.M. EDST, ISI personnel are normally on duty—at other times your OATS request will be taken by our answering service and your order will be processed immediately the following morning. Within hours after your call is received, the article you need is on its way to you, torn right from the original source journal.

ISI® **Institute for Scientific Information**

©1969 ISI

If you are not yet using a chemical-information service that gives you *all* these features, you are missing a major opportunity to improve the quality and economics of your research and development:

- Provides data files that can be searched for families of compounds and substructures by computer
- Identifies structural correlations missed in manual searches
- Facilitates structure-activity studies
- Minimizes computer storage and search costs
- Includes computer-search programs
- Supplies printed reports for manual searches
- Permits automated and manual searches for compounds by structure, biological activity, application, analysis method, researcher, and journal
- Includes monthly, semi-annual, and annual printed indexes of subject terms, authors, molecular formulas, and journals to simplify manual searches
- Provides diagrams of compound structures and reaction flows
- Supplies information weekly in printed-journal form and monthly on magnetic tapes
- Reports 165,000 new compounds and reactions a year
- Covers all the important chemical literature in the world
- Reports on new compounds within 30 to 60 days after initial publication

Why not investigate our INDEX CHEMICUS REGISTRY SYSTEM® which provides all of these features.

ISI® **Institute for Scientific Information**
325 Chestnut Street, Philadelphia, Pennsylvania 19106, Tel.: (215) 923-3300, Cable: SCINFO, TELEX: 84-5305

send details on the INDEX CHEMICUS REGISTRY SYSTEM® (ICRS®).

TOP SECRET

If your library hasn't already ordered WIPIS™ for 1971, then you might as well consider the information it contains top secret! Data in the 1971 Annual of ISI's WHO IS PUBLISHING IN SCIENCE™ just isn't available from any other single source.

Only ISI's unique multidisciplinary data base can give you the names and current addresses and organizational affiliations of more than 230,000 scientists and technologists who had a journal article published during 1970. Scientists from over 35,000 organizations around the world are included — scientists whose research work ranges from experimental to applied.

With WIPIS you can

- **Keep in touch with colleagues, exchange ideas, arrange meetings, or request reprints**
- **Check the level of scientific writing activity at specific organizations and their various departments**
- **Identify and locate little-known organizations — especially foreign ones**
- **Verify authors' names for bibliographies**

And WIPIS is easy to use. Indexing by name, organization, and geographic location makes it possible for you to use WIPIS without guidance. Result: You can help yourself while your librarian works on other projects.

Now that we've disclosed *some* of the details of WIPIS, we'll be happy to totally de-classify our top secret data for you. Do your librarian a favor and fill in the order coupon for her.

Please enter our order for _____ copy(ies) of ISI's WHO IS PUBLISHING IN SCIENCE™ (WIPIS™)—1971 Annual
PRICE — $90.00

SCIENCE CITATION INDEX®

the reference that sheds a whole new light on literature searching...

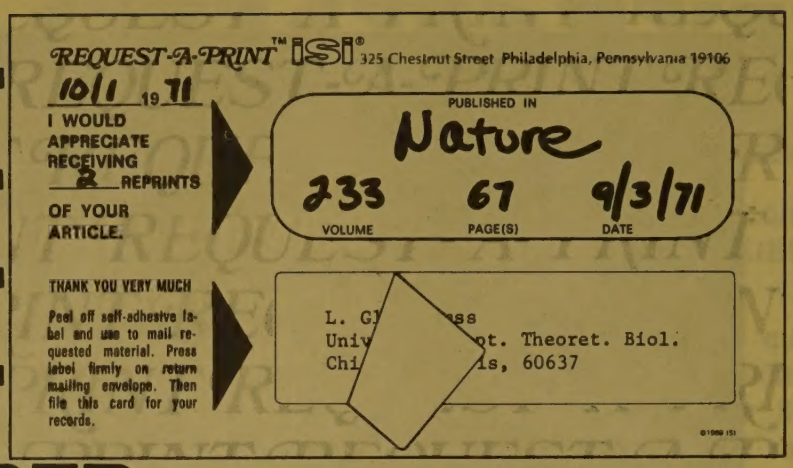
first place to look...for anything

Science Citation Index — the uniquely effective search tool that organizes the world's current scientific and technical journal literature by the author's own reference citations — retrieves more pertinent articles on almost any given subject, faster, than any other reference of any kind.

So it's the first place to look when you want to search the journal literature. For maximum certainty of finding what you're after. For speed and ease of finding it, too.

SCI® is based on the fact that one of the best guides to the subject matter of a scientific article is its bibliography — the people and articles the author himself cited to support his own work. It's called "citation indexing". And study after study has shown this method of organizing the journal literature more effective than conventional indexing systems.

What's more, the Science Citation Index is completely multi-disciplinary — covering every article in every issue of more than 2,400 scientific journals from all over the world. So you need only look in this one, instead of a number of different references.



The next time you need to know what's been published in any specific area of science and technology, turn first to the Science Citation Index. Chances are you'll turn to it first (and last) each time after that. For more on what the Science Citation Index can do for you, send for our free brochure.

THE REPRINT REQUEST THAT CAN'T BE IGNORED

Everybody's busier than they used to be. Scientific authors and their secretaries are no exception. Maybe that's why so many of your reprint requests go unanswered these days. People are just too busy to notice that little post card you've sent. Or they've got more important things to do than address envelopes.

Request-A-Print not only gets attention, it also makes it easier for authors to send reprints. That's because **Request-A-Print** features an adhesive label that's imprinted with your name and address. When an author gets your request, he peels off the label and sticks it on an envelope. Saves time. Prevents errors.

Request-A-Print.™ It can't be ignored.

I would like to be among the first in the scientific community to try this new method of requesting reprints. Please send me _____ thousand personalized **Request-A-Print** cards at $50 per thousand.

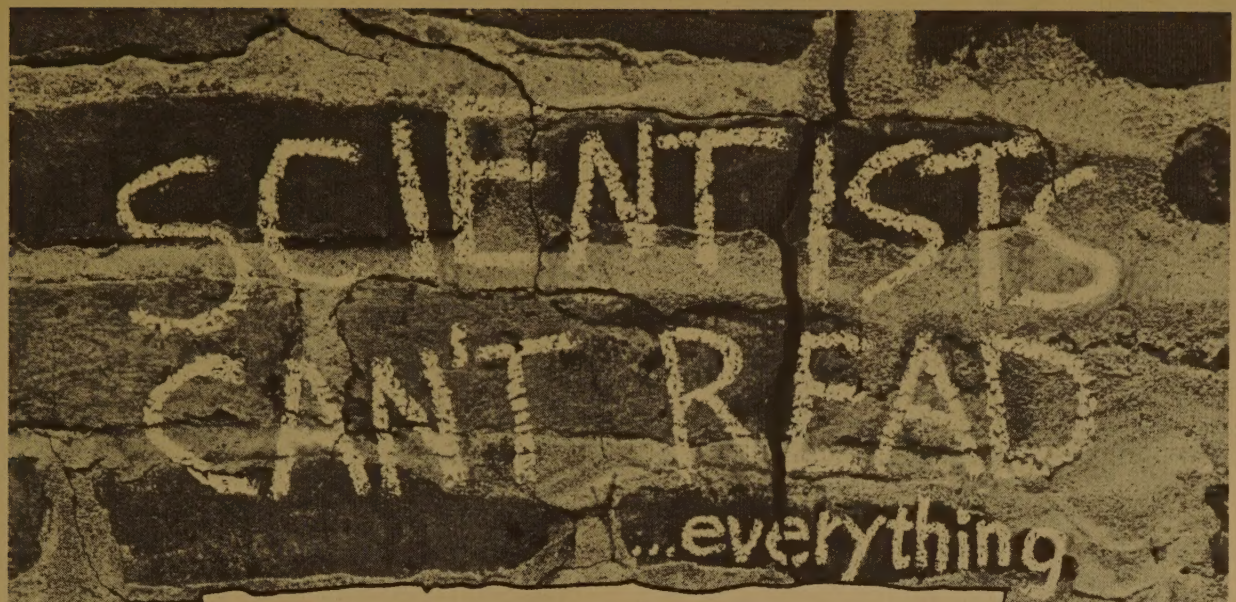
☐ Payment enclosed ☐ Purchase order to follow ☐ Bill organization

The following information should appear on my **Request-A-Print™** mailing labels:

Name & Title

Organization/Department

Street Address



City, State, Zip, Country

(Note: Limit of 30 characters per line—spaces and punctuation count as characters. Use abbreviations as required.)

That's why they need ASCA®—the current awareness information service that can and does "read everything" for them... to keep them on top of what's happening in their field. And ASCA does it for only $3.00 a week!

Tell us what subjects interest you. What authors. What research. Each week **ASCA** (**A**utomatic **S**ubject **C**itation **A**lert) will examine every article in hundreds of the world's key scientific and technical journals as soon as they're published. And each week we'll send you a personal customized computer report listing everything being published in your area of interest.

ASCA helps answer questions like: What are the latest developments in my field? Who else is working on this problem? What universities? What companies? What approaches are being investigated? What research is being done in other fields that might affect my own? **ASCA** tells you the kind of information you need to know... the kind of information practically impossible to obtain in any other way.

Best of all, you can put **ASCA** to work for you for thirteen weeks for just $39. Call or write ISI for details.

SPECIAL INTRODUCTORY OFFER—a full 13 weeks for $39

☐ I'd like to take advantage of your introductory offer and try ASCA for 13 weeks. Please contact me.

☐ Please tell me more about ASCA and what it can do for me.

(Journal of the Pharmaceutical Society of Japan),
91 (7), 770-2 (1971)

Khimiya Geterotsiklicheskikh Soedinenii,
1971 (6), 770-2 (1971)

We found them with the **Chemical Substructure Index™ (CSI™)** — the chemical literature search tool of the future that's here now.

CSI is the world's only index that lets you conduct fast, efficient substructure searches. It can help you locate all compounds containing the same functional group or fragment. Or it can help you find all compounds with a similar ring system. And your **CSI** search can be as selective or as general as you wish. You're limited only by your imagination. And you can do all this yourself—without the help of a computer!

CSI is published monthly, so you can use it to keep up with new compounds. Annual cumulations back through 1967 let you do retrospective searches too.
